

Introducing the Cyber Kill Chain Spotlight® Series

From HAFNIUM to Kaseya and beyond, cyber threats are ever-present and ever-changing as businesses must rely more and more on technology for success. Don't let attackers turn your company into just another link in the "chain of fools," as Aretha Franklin famously sang – instead, join a diverse panel of Lodestone's subject matter experts (SMEs) in a deep dive into the Cyber Kill Chain®.

Lockheed Martin's Cyber Kill Chain® framework is a model for understanding the common steps taken by adversaries to achieve their objectives via cybersecurity incidents. As a defensive tool, it can be used to understand attacker behavior and assist in the development of security controls to identify attacks at the earliest possible stage. For additional information on the in the Cyber Kill Chain® itself, visit the following link: www.lockheedmartin.com.

Over the next several months, Lodestone's Cyber Kill Chain® Spotlight series will explore the stories and strategies of large and small companies alike in the face of adversaries from inexperienced "script kiddies" to nation-state level advanced persistent threats (APTs), and offer expert takes on combatting malicious activity at every step in the process.

Visit us at www.lodestone.com/insights/ on the first Monday of each month, starting in August, for the latest insights, tips, and tricks to help promote improved prevention and detection capabilities for companies of all sizes. For a list of scheduled releases and links to published articles in the series, see below:

Cyber Kill Chain Spotlight 1: Reconnaissance – Coming August 4, 2021

Cyber Kill Chain Spotlight 2: Weaponization – Coming September 1, 2021

Cyber Kill Chain Spotlight 3: Delivery – Coming October 6, 2021

Cyber Kill Chain Spotlight 4: Exploitation – Coming November 3, 2021

Cyber Kill Chain Spotlight 5: Installation – Coming December 1, 2021

Cyber Kill Chain Spotlight 6: Command and Control – Coming January 5, 2022

Cyber Kill Chain Spotlight 7: Actions on Objectives – Coming February 2, 2022

The Cyber Kill Chain Spotlight Series: Closing Thoughts – Coming February 9, 2022
