

Lodestone

Experience.
Intelligence.
Performance.

Why Lodestone

Lodestone is a global cybersecurity firm committed to helping clients prevent, investigate, and prepare for security incidents. It was built from the ground up to offer an innovative, behavior-based approach to proactive cybersecurity and digital forensics and incident response (DFIR). We are comprised of top investigative talent and offensive security experts from several of the world's largest cybersecurity firms, as well as military veterans and former members of national security organizations, including the Federal Bureau of Investigation (FBI) and the National Security Agency (NSA). We combine this expertise with our unique understanding of legal requirements through our relationship with our parent company, Beazley, which has been at the forefront of cyber insurance for over a decade. Through this relationship, Lodestone has developed a unique understanding of the intersection between insurance and cybersecurity while preventing, preparing for, and responding to some of the toughest security challenges that industries face today.

Compliance

Since its foundation in 2017, Lodestone has offered its customers insight into both cybersecurity and the cyber insurance industry. We help companies align and stay compliant with cyber insurance coverage requirements. In addition, we offer discounts to channel partners to form long-term relationships.

Security Focus

Lodestone's experts live and breathe cybersecurity and are committed to helping customers face some of the biggest challenges of their careers. We do not sell vendor security products – our offerings are purely service-focused, and any third-party tools we recommend are the product of genuine, vendor-agnostic, and tested endorsement, not business deals.

Expertise

Lodestone's approach to Incident Response is to have the top cybersecurity experts in the world, as the lead, and as the touchpoint, when responding to cybersecurity incidents. This is done with the backing of comprehensive, real-time threat intelligence to provide clients with protection across the life cycle of a potential security event or incident.

Tailored Approach

We understand the individual challenges of every situation and consider the human side of the equation, never taking a "one size fits all" approach. We blend design, threat intelligence, and technology with human insights to provide clients with the greatest cybersecurity advantage.

Threat Intelligence

Our deep understanding of threat actor tactics, techniques, and procedures (TTPs) is based on decades of experience in DFIR and the diligent gathering of threat intelligence from all possible sources.

Agility

Time is of the essence before, during, and after an intrusion. We stand ready to move in quickly and effectively at the first sign of an intrusion.

Keeping the world's critical infrastructure safe

We know what keeps senior leaders awake at night and what threat actors are looking for when they attempt to breach the defenses of hospitals, universities, retailers, manufacturers, and government offices, among others.

Actors don't target specific industries but rather specific vulnerabilities. Virtually every industry faces some level of risk. Add to that the nuanced requirements of organizations in securing their operations and information while meeting regulatory compliance — the challenge of protecting valuable assets and reputations can be daunting.

Our technical skills and deep understanding of sector-specific requirements combined with our industry-leading threat intelligence enable us to partner with clients to minimize losses, mitigate risk, control costs, and keep reputations intact.

Healthcare

Securing patient privacy, clinical research, and healthcare infrastructure.

Higher Education

Protecting the institution and its students in an increasingly threatening environment.

Retail

Maintaining high-quality customer service while securing valuable data.

Financial Services

Managing and orchestrating a growing security portfolio as attacks proliferate.

Manufacturing

Protecting and enhancing value with dynamic cyber risk management.

Government & Non-Profit

Protecting critical infrastructure from cyberattack.

Services to Protect and Defend.

Lodestone is comprised of top talent from private industry, government, intelligence, and law enforcement specializing in incident response, digital forensics, offensive security, risk management, and threat detection. In addition to world-class MDR and Digital Forensics and Incident Response capabilities, Lodestone provides a range of services aimed at helping clients prepare for, prevent, and respond to security incidents.

Our focus is on the reduction of risk, and being prepared should the worst occur.

Governance, Risk and Compliance Advisory

- CIS-18 Gap Analysis
- Incident Response Plan Development
- Security Policy Review and Development
- Security Awareness Training
- Tabletop Exercises
- Virtual CISO

Offensive Security

- Active Directory Hardening Assessment
- Email Hardening Assessment
- Penetration Testing
- Phishing Campaign Assessment
- Red Team Assessment
- Vulnerability Assessment
- Web Application Penetration Testing

Digital Forensics and Incident Response

- Assumed Breach Analysis
- Digital Forensics Investigation
- Incident Response Investigation

Restoration

- Post-Incident Rehabilitation

Security Operations Center

- Attack Surface Monitoring
- Managed Detection and Response

Mission

To safeguard our clients against cyber threats by developing and implementing solutions that address their risks.

Vision

Advance cyber resilience through innovation, expertise, and vigilance.

Values

- Belonging – We value every background.
- Accountability – We are accountable to our clients and each other.
- Service – The most important aspect of our business is service to our clients and team.
- Integrity – We are dependable, honest, and always act with respect.
- Curiosity – We seek to understand and explore innovative ideas that solve problems.
